Note - The better you get you can try different techniques like palm muting (Dampering the string) every 2nd note.

`g your guitar, with a pick in your right hand, look at your right hand while you do a karate ı the strings, so that your hand is at a right angle to the strings. Now sweep across all the , making sure the skin of your hand keeps contact with all the strings, so that the sound of . string is blocked. You should just hear a BLIP as you rake the pick over the strings.
